SUBJECT: REVIEW OF THE COMPREHENSIVE TREATMENT AND MANAGEMENT PLAN -
JMK-0319-92

ALAN D. D

Attached is a copy of a document entitled, "Comprehensive Treatment and Management Plan (CTMP)." This Plan was prepared in accordance with the terms of the May 10, 1991 Land Disposal Restriction Federal Facility Compliance Agreement (LDR FFCA). The LDR FFCA is an agreement between the Department Of Energy (DOE) and the Environmental Protection Agency (EPA), and provides time for the Rocky Flats Plant (RFP) to develop and implement certain programs and systems to come into compliance with the LDR portion of the Resource Conservation and Recovery Act (RCRA). In order to ultimately achieve compliance, RFP must develop the ability to treat many mixed waste streams prior to disposal. The purpose of the CTMP is to describe the mechanism under which (RFP) will develop and implement specific treatment systems to treat mixed waste.

At this point in time, specific treatment systems have been chosen (e.g., Thermal Treatment, Non-Thermal Treatment, Solidification, etc.), and fairly detailed schedules have been developed for implementing the various technologies. The CTMP summarizes those systems and schedules. Because the development and implementation of these treatment systems will involve significant resource commitments from a variety of organizations at RFP, I would like to request that you and/or your technical staff review this document not only for content, but also in conjunction with what you know to be the future at RFP. Currently, this information is an exercise in paper generation, but once it is submitted to, and approved by, the EPA in June 1992, the schedules and milestones become enforceable under the terms of the LDR FFCA.

Because all the supporting information cannot be included in the CTMP, the authors of this document will make themselves available at your convenience to discuss the information contained in the Plan. In addition, I would like to establish a single point of contact, if possible, within your organization to enable us to coordinate future reviews and work all future issues. If this sounds reasonable, please return your comments and the name of an appropriate contact to me by April 17, 1992. In the meantime, if you would like additional copies of this document, or if you have questions and comments, please contact one of the following individuals:

Scott Anderson
Bob Krenzer
Jonathan Wade

LDR FFCA Program Manager
CTMP Tech. Dev. Prog. Manager
CTMP Technical Manager
